

## CLAIMS

I Claim:

1. A portable salon station system, comprising:  
an enclosure comprised of a base and a cover, wherein said cover is removably connectable to said base;  
a support member pivotally attached within said base at a pivot point;  
a plurality of holder members attached to said support member;  
a guide member pivotally attached within said base; and  
a guide slot within said guide member that slidably receives a pin extending from said support member.

2. The portable salon station system of Claim 1, wherein said base and said cover have a heat resistant inner liner.

3. The portable salon station system of Claim 1, including a handle attached to said enclosure.

4. The portable salon station system of Claim 1, including a support platform attached within said base that said support member and said guide member are pivotally connected to.

5. The portable salon station system of Claim 1, wherein said guide slot is curved.

1  
2  
3           6. The portable salon station system of Claim 5, wherein said guide slot has an  
4 upper catch portion extending along the radius of movement of said guide member,  
5 wherein said upper catch portion selectively catches said pin to retain said support  
6 member in an upright position.

7  
8  
9           7. The portable salon station system of Claim 1, wherein said base includes a  
10 plurality of feet.

11  
12  
13           8. The portable salon station system of Claim 1, wherein said holder members  
14 have a tubular structure.

15  
16  
17           9. The portable salon station system of Claim 8, wherein said holder members  
18 are substantially vertical when said support member is positioned in an upright  
19 position.

20  
21  
22           10. A portable salon station system, comprising:  
23           an enclosure comprised of a base and a cover, wherein said cover is removably  
24 connectable to said base;  
25           a transporting structure having a plurality of wheels, wherein said transporting  
26 structure removably receives said enclosure;  
27           a support member pivotally attached within said base at a pivot point;  
28           a plurality of holder members attached to said support member;  
29           a guide member pivotally attached within said base;

1 a guide slot within said guide member that slidably receives a pin extending  
2 from said support member;  
3 wherein said base and said cover have a heat resistant inner liner;  
4 a handle attached to said enclosure;  
5 a support platform attached within said base that said support member and said  
6 guide member are pivotally connected to;  
7 wherein said guide slot is curved;  
8 wherein said guide slot has an upper catch portion extending along the radius of  
9 movement of said guide member, wherein said upper catch portion selectively catches  
10 said pin to retain said support member in an upright position;  
11 wherein said base includes a plurality of feet;  
12 wherein said holder members have a tubular structure;  
13 wherein said holder members are substantially vertical when said support  
14 member is positioned in an upright position;  
15 wherein said transporting structure is comprised of:  
16 a plurality of support poles attached to said wheels;  
17 a lower support attached to and extending from a lower portion of said  
18 support poles in a non-movable manner;  
19 an upper support slidably attached to and extending from an upper  
20 portion of said support poles; and  
21 a locking lever within said upper support for selectively locking a  
22 position of said upper support.

23  
24  
25 11. A portable salon station system, comprising:  
26 an enclosure comprised of a base and a cover, wherein said cover is removably  
27 connectable to said base;  
28 a transporting structure having a plurality of wheels, wherein said transporting  
29 structure removably receives said enclosure;

1 a support member pivotally attached within said base at a pivot point;  
2 a plurality of holder members attached to said support member;  
3 a guide member pivotally attached within said base; and  
4 a guide slot within said guide member that slidably receives a pin extending  
5 from said support member.  
6  
7

8 12. The portable salon station system of Claim 11, wherein said base and said  
9 cover have a heat resistant inner liner.  
10  
11

12 13. The portable salon station system of Claim 11, including a handle attached  
13 to said enclosure.  
14  
15

16 14. The portable salon station system of Claim 11, including a support  
17 platform attached within said base that said support member and said guide member  
18 are pivotally connected to.  
19  
20

21 15. The portable salon station system of Claim 11, wherein said guide slot is  
22 curved.  
23  
24

25 16. The portable salon station system of Claim 15, wherein said guide slot has  
26 an upper catch portion extending along the radius of movement of said guide member,  
27 wherein said upper catch portion selectively catches said pin to retain said support  
28 member in an upright position.  
29

1  
2           17. The portable salon station system of Claim 11, wherein said base includes a  
3 plurality of feet.  
4

5  
6           18. The portable salon station system of Claim 11, wherein said holder  
7 members have a tubular structure.  
8

9  
10          19. The portable salon station system of Claim 18, wherein said holder  
11 members are substantially vertical when said support member is positioned in an  
12 upright position.  
13

14  
15          20. The portable salon station system of Claim 11, wherein said transporting  
16 structure is comprised of:  
17           a plurality of support poles attached to said wheels;  
18           a lower support attached to and extending from a lower portion of said support  
19 poles in a non-movable manner;  
20           an upper support slidably attached to and extending from an upper portion of  
21 said support poles; and  
22           a locking lever within said upper support for selectively locking a position of  
23 said upper support.  
24
